SUMMARY

Experienced professional with a background in content moderation successfully transitioning to a career as a software engineer. Graduated from Coding Temple with a comprehensive understanding of programming languages and development methodologies. Proficient in analyzing and managing online content for quality and compliance. Acquired strong problem-solving skills and attention to detail through content moderation roles. Eager to leverage a combination of content moderation experience and newfound programming capabilities to contribute effectively as a software engineer.

EXPERIENCE

Software Engineer Trainee

Coding Temple 📅 01/2023 - Present 📍 Remote

- Developed an Art Gallery website by combining HTML, JavaScript, and CSS. Collaborated closely with the Art Institute of Chicago to integrate API-driven data retrieval
- Engineered a front-end application using React.js and TypeScript to optimize website performance and provide a seamless, user-friendly interactive experience
- Implemented object-oriented programming (OOP) in Python to meticulously architect the behavior and functionalities of a blackjack and a rock-scissors-paper games
- Reorganized and optimized the non-profile segment of our custom careers application, employing React/Redux and Node/Express, resulting in enhanced reliability and performance
- Deployed Flask and React applications on Netlify to improve developer productivity and accessibility through efficient hosting and user management

Bilingual Content Reviewer – Trust and Safety

Accenture Flex 📅 08/2022 - Present 📍 Austin, TX

- Meticulously evaluating multilingual content, ensuring meticulous compliance with stipulated guidelines and regulations for esteemed clients
- Lead the categorization of sensitive content based on age-specific criteria, streamlining content management processes
- Swiftly address and investigate potentially harmful data, showcasing proactive acumen in safeguarding the digital landscape.
- thoroughly analyze diverse content types, including War Conflict, Hate Speech, Violence, and Adult Content, within strict Service Level Agreements
- Achieved a daily feat by successfully meeting production targets resulting in 40% increase.

Technician

Ifix Station 📅 04/2021 - 07/2022 📍 Wayne, NJ

- Performing advanced repairs on mobile devices, tablets, and cutting-edge technology, including screen and battery replacements, consequently effectively contributing to a 20% increase in target achievement

EDUCATION

Business Adminstration

Bergen Community College 📅 2022 - 2022 📍 Paramus, NJ

SKILLS

Languages

Python

JavaScript(ES5/ES6/ES7/NodeJS)

TypeScript JSON HTML5

CSS3

Frameworks

React Flask Bootstrap

Material UI

Databases

SQL(PostgreSQL) MongoDB

Tools

Git Github Heroku Netlify

Certification

Coding Temple- Software Engineer

PROJECTS

Liquor Shop

- 🔗 <https://liquorshop.netlify.app/>
- Created React.ts e-commerce app with optimized cart management and user communication
 - Integrated Auth0 for streamlined authentication and nabled smooth liquor management API integration with Flask that allows efficient addition, updates, and deletions in the database

Whiskey Collection

- 🔗 <https://whiskeycollection.onrender.com/>
- Engineered a Flask application featuring secure log in, sign up, and sign out forms, supported by dedicated tokens for robust user authentication
 - Utilized Insomnia in conjunction with elephantSQL to effectively manage database operations, encompassing data addition, deletion, and updating
